Event Production & Experience Agency

Creative direction, staging, technical production and on-ground delivery

Sectoral Diagnostics Report (SDR) Summit · 2026

Location: El Gouna, Egypt

Dates: Thursday 10 – Saturday 12 September 2026

Issued July 2026

1. Introduction & RFP Purpose

The Entlaq Sectoral Diagnostics Report (SDR) Summit is the flagship moment for the launch of Entlaq's annual diagnostic of Egypt's entrepreneurship ecosystem – a three-day gathering that turns a landmark report into policy momentum, capital connections, and concrete commitments.

Purpose of this RFP

Entlaq is inviting proposals from experienced event production and experiential agencies to design, produce, and deliver the full on-ground production of the SDR Summit across all three days and all venues in El Gouna.

We are looking for a partner who can translate the “Diagnose → Dive → Do” concept into a cohesive, premium physical experience — from the headline report-launch moment to the gala, the working sessions, and the farewell — while managing the technical, logistical, and creative complexity of a multi-venue destination summit for ~500 senior guests.

What success looks like

- A signature, memorable Report Launch moment that does justice to the data and the ambition of the SDR.
- A seamless, premium guest experience for VVIP, VIP, and standard tiers across every touchpoint.
- Flawless technical delivery and a calm, well-run show across three days and multiple venues.

About the SDR Summit

Entlaq is convening senior policymakers, international and regional investors, founders, corporates, and media in El Gouna to unveil the SDR — a data-driven diagnostic spanning ten priority sectors of the Egyptian economy — and to advance the momentum around the national Startup Charter. The Summit is designed as a premium, invitation-led experience that positions Egypt as a serious destination for founders and capital.

The design logic — a three-act journey: **Diagnose → Dive → Do**. Day 1 lands the report and the macro outlook, Day 2 explores sectors and deal opportunities, and Day 3 converts insight into commitments. Every session ties back to either a report finding or concrete action.

Format philosophy. The Summit deliberately moves beyond panel-heavy programming toward a richer mix of formats — fireside chats, interactive workshops, live polling, curated matchmaking, and demo sessions — to maximise engagement. Evenings host the main stage; mornings focus on smaller workshops, roundtables, and matchmaking in air-conditioned venues; middays are reserved for networking and leisure.

The Entlaq Sectoral Diagnostics Report (SDR) Summit is the flagship moment for the launch of Entlaq's annual diagnostic of Egypt's entrepreneurship ecosystem – a three-day gathering that turns a landmark report into policy momentum, capital connections, and concrete commitments.

2. Event Snapshot

Host	Entlaq
Destination	El Gouna, Red Sea, Egypt
Main venue	SIA — the primary main-stage venue for the evening programmes and the report launch.
Roundtable venue	The sector roundtables will be held in a separate area within El Gouna, distinct from SIA — likely a campus setting such as the TU Berlin El Gouna campus or another El Gouna school venue (final venue to be confirmed).
Other spaces	VIP lounge, matchmaking, workshop rooms, gala and marina dinner venues to be confirmed during the site inspection.
Dates	Thu 10 Sept 2026 — Sat 12 Sept 2026
Audience	-500 guests: VVIPs (ministers, international investors), VIPs (key founders, C-level, media heads), and standard invitees. Invitation-led, with a limited curated public registration.
Hospitality	-150 rooms across El Gouna hotels for covered guests and team; flights covered for international investors. Internal transport (shuttle + cars) between hotels and venues.
Digital layer	Entlaq-controlled event app: 1:1 matchmaking, sector-room sign-ups, live main-stage polling, and content access.
Sponsors	Multiple sponsors with tiered benefits — tiers and entitlements to be confirmed (TBD).

3. Programing Overview

The Summit runs across three themed days. The working agenda is still being finalised and specific sessions and timings will continue to change, so the outline below is intended only to convey the overall shape of each day. The selected partner should plan for flexibility and build the final run-of-show together with Entlaq.

- **Day 1 – Thu 10 Sept · “The State of the Ecosystem”** – Daytime arrivals and check-ins, then an evening main-stage programme built around the headline report launch, followed by the Gala Dinner (~300 guests, separate location).
- **Day 2 – Fri 11 Sept · “Where Growth Happens”** – Morning roundtables in air-conditioned venue and a midday brunch, then a sector-focused evening main-stage program, closing with an informal Marina Dinner.
- **Day 3 – Sat 12 Sept · “From Insight to Action”** – A morning of wellness and hands-on capacity-building workshops, a midday main-stage close with potential announcements, then farewell and departures by mid-afternoon.

4. Scope of Work

The scope below is indicative and may be refined jointly with the selected partner and finalised after a site inspection. Proposals should address each workstream and flag anything the agency recommends adding or handling differently.

4.1 Creative & experience design

- An overarching creative concept across all venue touchpoints, stages, print, and digital touchpoints, rooted in the three-act “Diagnose → Dive → Do” narrative.
- The signature SDR Report Launch moment – an interactive main-stage reveal built around a live data-wall with audience polling.
- Experience design for a varied program mix: panels, fireside chats, interactive keynotes, roundtables, live polling, demo/exhibition areas, and curated matchmaking zones.
- Guest-journey design across tiers, including welcome/arrival experience, VIP lounge, and VVIP concierge areas.

4.2 Stage, set & scenic

- Main-stage design and build at SIA for the evening programs (Day 1 and Day 2) and the Day 3 midday close.
- The live data-wall / large-format LED for the report launch and live polling, integrated with the Entlaq app data feed.
- Scenic and set for satellite spaces: the roundtable venue, VIP lounge, matchmaking and dinner/brunch areas.
- Event branding, venue dressing, wayfinding and signage across all zones, plus badges and printed collateral (design and/or production to be agreed).

4.3 Technical production – AV, lighting & sound

- Full audio-visual, lighting, and sound for the main stage and all breakout rooms.
- Live-polling integration and on-screen data visualization, coordinated with the Entlaq team.
- Content and presentation management, on stage monitors, and speaker support.

4.4 Evening & social productions

- **Gala Dinner (Day 1 night)** – a lounge-and-tables setup for ~300 guests, live music or DJ, a dedicated VVIP area, and staging for opening/closing addresses. Standing/lounge format with live music preferred over formal seated service. Candidate venues include Migumi or Villa Coconut, with other suggestions from the agency welcome.
- **Marina Dinner (Day 2 night)** – an informal, roaming pass-around and networking ambience to close the night.
- **Wellness activation** – setup and ambience for the Day 3 sunrise beach yoga activation.
- **Breaks & activations** – activations and light entertainment between sessions and during coffee breaks – creative ideas welcome.

4.5 Registration, guest & lounge infrastructure

- Registration and badge-collection setup, plus app-onboarding stations, for staggered arrivals.
- Welcome reception area, VIP lounge fit-out, and VVIP concierge/security-adjacent zones.
- Furniture, furnishing, and comfort provisions for the air-conditioned morning venues.

4.6 Production management & on-ground delivery

- Load-in / load-out and site logistics across El Gouna venues (SIA main stage, the roundtable venue, gala venue, marina, and hotel touchpoints).
- Full crew, stage management, and technical rehearsals and a final walkthrough.

5. What to Include in Your Proposal

Please structure your submission around the following.

1. Creative concept and design direction.
2. A technical production plan and equipment for each space.
3. A detailed, itemized budget broken down by function, with clear assumptions and any optional add-ons priced separately.
4. Project team and structure.
5. A production timeline and critical path from award.
6. Relevant experience and case studies – ideally comparable summits, launches, or destination events (work at El Gouna is a plus).

6. Submission & Contact

Proposals should be submitted by the **10th of August 2026**. Please send a proposal together with an itemized budget. Please submit it over email to procurement@entlaq.com.
